

## **EDIN USVI - BUSINESS, ORGANIZATIONAL, AND GOVERNMENT PARTICIPANTS**

This list is not a recommendation from VIEO for any service or product offerings. The individuals listed here are active participants in the EDIN USVI efforts to reduce petroleum consumption in the US Virgin Islands. They have taken time out of their busy schedules to attend meetings, assist with events, research pertinent issues, and assist the effort in achieving stated goals in order to accomplish the achievements required by Act 7075.

Through this dedication, they are contributing to a better life for all VI residents. The VIEO hopes this site will assist in networking amongst the contributors and the ability for island residents to identify those businesses and organizations that are actively attempting to improve the energy position of the USVI.
