

WISE CUSTOMER PROCESS

Contact Miguel Quinones with the VI Energy Office

Customer completes a USVI WISE application and submits to Nora Barger with 12 months past utility data and a current bank statement/ bank letter

If application meets the basic requirements, energy assessment is scheduled with Quality Electric Supply

From the energy assessment, energy efficiency improvements will be recommended to reach at least 15% estimated energy savings

Customer contracts with installation contractor within 30 days of assessment to move forward with work; cost of assessment is rebated through the program

Energy efficiency improvements installed

Installation approval completed; verification devices installed

Customer receives 40% grant for the cost of the improvement work

PROGRAM INCENTIVES:

- Grant for 40% of project costs up to \$80,000
- Energy assessment cost subsidized if customer commits to project within 30 days

PROGRAM ELIGIBILITY:

- Business with electric usage of 30,000 kwhs per month or less
- Ability to improve energy consumption by at least 15%
